

Corporate Policy Number 52	Date Last Updated: January 2025 Date for Next Review: January 2027 Director Responsible: TM Sidaway
Waste and recycling	

1. Introduction

Our charity understands the importance of waste management and its effect on the environment. We are committed to minimizing waste production by employing Reduction, Re-use, and Recycling techniques whenever possible, although we recognise that our opportunities to do this are limited. We are committed to ensuring that all operations and activities are fully compliant with all current waste management legislation.

2. Aims

1. To encourage minimisation of waste production throughout the Society by Directors, volunteers and members.
2. To operate within full compliance of Environmental Law

3. Objectives

1. Identify areas of waste production throughout our operation, including that produced by members as a result of our joint activities.
2. Employ effective waste management practices to identify the most efficient methods to reduce the production of waste and to maximize the re-use or recycling of waste material.
3. Manage the process to ensure compliance with best practice
4. Through communication and support, ensure that all Directors, volunteers and members are aware of our joint initiatives to minimise our impact on the planet.
